

IGEL Software

- IGEL Linux
- Microsoft® Windows® Embedded Standard 2009
- Microsoft® Windows® Embedded CE 6.0

IGEL Linux

The most cost effective operating system with the best performance. IGEL Linux comes with a broad set of Digital Services giving the user the possibility to access the needed application with the best protocol. IGEL's embedded Linux offers maximum stability and security. Having a strong in house development IGEL customers can be sure to get always the newest updates and features integrated in a rock-solid firmware.

Features	Benefits
High performance on moderate hardware requirements	Best price performance ratio
Embedded closed system	Maximum system stability
Small footprint and modular design	Bandwith friendly system updates

Windows Embedded Standard 2009

Windows Embedded Standard delivers the power of Microsoft Windows XP in a Thin Client. With 32 bit Windows compatibility for local applications and drivers. Including a full featured local Internet Explorer and Mediaplayer users have all required capabilities and the maximum flexibility.

Features	Benefits
Customizable via application installation	Expand the system to your needs
Genuine Microsoft RDP	Always get the latest Microsoft specific RDP protocol enhancements
Microsoft user interface	No user retraining through familiar user interface

Windows Embedded CE 6.0

Windows CE uses the familiar desktop interface without the high cost of a full-featured Windows XP Embedded operating system. Due to the fact that no local applications or drivers can be added by the user the system offers high security and stability. The footprint of the Windows CE operating system is the smallest of any Windows embedded operating system.

Features	Benefits
Low hardware requirements	Best performance even on entry hardware platforms
Genuine Microsoft RDP	Always get the latest Microsoft specific RDP protocol enhancements
Embedded closed system.	Maximum system stability

Universal Management Suite

Bundled with every IGEL thin client is a full version of IGEL Remote Management Suite. This powerful yet easy to use tool allows you to manage all your IGEL clients remotely, saving money, reducing time and hassle.

Features	Benefits
Intuitive User Interface	Easy to use with identical setup pages like in the local setup
Profile based configuration	Apply your settings to hundreds of clients with just a few clicks.
Encrypted communication	Secured management of your infrastructure
